

## LIVING IN HEALTHY WATERWAYS

Some waterbugs are sensitive to changes in their watery home. They can't survive if there's too much pollution. These are called Sensitive or Very Sensitive waterbugs.

Waterbugs that can tolerate change and pollution are called Tolerant or Very Tolerant Waterbugs.

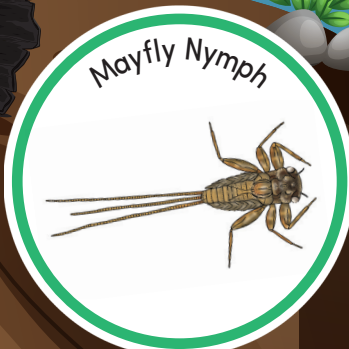

### ON OR NEAR THE SURFACE

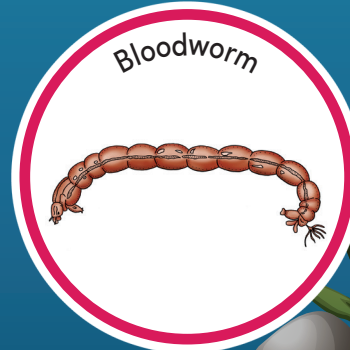

### AMONG PLANTS AND DEBRIS

### OPEN WATER

### AMONG ROCKS AND SEDIMENT

#### MY COLOUR CODE

- Very Sensitive
- Sensitive
- Tolerant
- Very Tolerant
